

KS MIECHV Benchmark Performance Standards

Fiscal Year 2023 to 2025

MIECHV Demonstration of Improvement

Welcome! We're glad you've made it here. This tool is designed to enable you to monitor your organization's benchmark performance. Please begin by opening the **Benchmark Measure (Form 2)** report in DAISEY and select the appropriate **reporting year**.

To determine improvement, HRSA is defining "improvement" as meeting one or both of the following criteria:

- 1) Any change in the intended direction for that measure, compared to the baseline
- 2) Meeting or exceeding the established threshold for a measure, while simultaneously not decreasing performance from baseline by more than 10%.

Please note that in the following tables, the asterisk (*) indicates that system outcomes are more distal to home visiting and less sensitive to change due to home visiting services alone.
