Kansas UHV DAISEY Report Guide

Data Quality Report

Purpose of this report

This report will assist home visitors, supervisors, and state leads with identifying missing or incorrect data to ensure complete and correct data is represented.

Reminder: Data included in this report is tied to Caregiver Profiles, Child Profiles, and UHV Visit Forms with a Date of Activity within the selected reporting period.

What is counted in this report

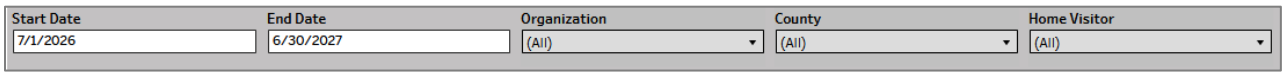

This report represents data entered into DAISEY for Kansas UHV programs. All dashboards provide information on Missing and Complete data. Some questions are conditional questions and are only evaluated when responses to previous questions trigger them to appear.

DAISEY reports update on a nightly basis. Data entered into DAISEY by end of business will be available in reports the next day.

Report filters

Reports can be filtered by Start Date, End Date, Organization, County, and Home Visitor, which can be selected in a drop-down menu.

Report dashboards

The dashboards for the Data Quality Report are arranged by UHV forms and referral-related data collection. To identify records with missing information, click on one of the bars within the dashboard to view the associated records in the caregiver (or child) table on the right side of the dashboard.

Note: Questions marked with an asterisk (*) are conditional questions that only appear based on responses to previous questions. To find the caregiver/child missing an answer, select the orange bar and the Caregiver/Child IDs will be listed in the right column.

Using the Data Quality report to review DAISEY data

Reviewing profile data

Each bar in the dashboard represents a specific data field on the Caregiver Profile, Child Profile, or UHV Visit Form. For example, the bar "IRIS ID" on the Caregiver Profile Missing Questions dashboard (Fig. 3) corresponds to "IRIS Family ID#" on the Caregiver Profile form in DAISEY (Fig. 4). Clicking on the orange missing data on each bar will filter the Caregiver or Child names to only those missing that piece of data.

Reviewing home visit and referral data

Similar to the Caregiver and Child Profile dashboards, the Visit Form and Referral dashboards highlight UHV Visit Form data completion. They also display the Date of Activity alongside the Caregiver ID and Name, making it easier to identify and investigate data issues.
