

Iowa MIECHV DAISEY Technical Assistance Brief

Form 1 Report Guide

PURPOSE OF THIS REPORT:

This report provides data on services and aggregate participant data (i.e. demographics) for Iowa MIECHV home visitation. The tables in this report were determined by reporting requirements of the MIECHV funder, Healthy Resource and Services Administration (HRSA).

WHAT THIS REPORT REPRESENTS

Data from Primary Caregiver and Target Child profiles, Home Visit Review Form, and Enrollment & Annual Reports for the Primary Caregiver and Target Child will be reflected in this report. Forms completed in the current fiscal year will be reviewed for responses. Where there is not yet data for the current fiscal year, data from the previous fiscal year will be used. If any forms are missing from both the current and previous fiscal year, the data taken from these forms will be considered "Unknown/Did not report".

USING FILTERS

Use the following filters to determine the data to review:

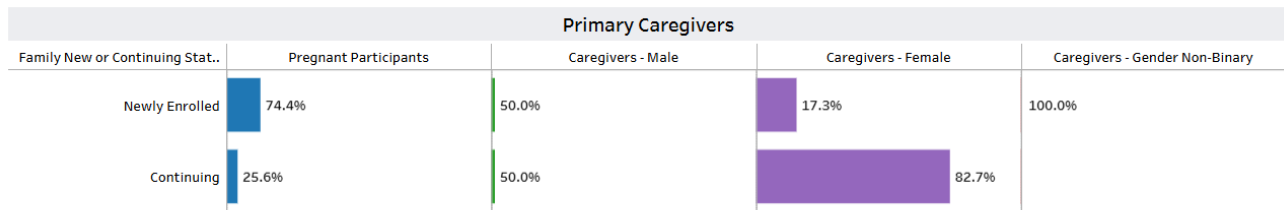

Select Reporting Year, Select Reporting Period, Grantee, Organization, County, Home Visiting Model, and Home Visit Type. Grantee, Organization, County, Home Visiting Model, and Home Visit Type parameters are multi-select; reports will show all data for all selected choices.

The Home Visit Type filter can be used to identify caregivers who are in need of a home visit to be counted in Form 1 submission for the fiscal year.

Select Reporting Year	Select Reporting Period	Grantee	Organization	County	Home Visiting Model	Home Visit Type
Oct 2024 to Sep 2025	Full Year	(All)	(All)	(All)	(All)	(All)

*Reports will only display if the correct Grantee - Organization is selected and match the user's access in DAISEY

Table 1 - Unduplicated Count of New and Continuing Program Participants Served by MIECHV

Primary Caregivers			
	Newly Enrolled	Continuing	Total
Pregnant Participants	99	34	133
Caregivers - Female	117	561	678
Caregivers - Male	12	12	24
Caregivers - Gender Non-Binary	1	0	1
Total	229	607	836

*Reports will only display if the correct Grantee – Organization is selected and matches the user’s access in DAISEY.

REVIEWING DATA

Each tab shows data in two ways, a bar graph and a table. The bar graph is intended to provide a quick and easy visualization of the data.

To determine who is counted in a bar, it is necessary to access the underlying data. Instructions on how to access underlying data can be found in the “How To” report guide, <http://daiseyiowa.daiseysolutions.org/articles/fssd-accessing-underlying-client-level-data/>.

Please see the table on the following page for more details on interpreting logic for table 14.
